

## Home learning for Music Summer Term 2

The last lot of work with activities for performing, composing and appraising as well as additional extension activities were due to last for 4-5 lessons. As we have only had 1 or 2 opportunities on the timetable to explore these activities, you should keep going with them. If you find you have finished with these resources, please try some of the ideas below to keep up with musical learning. In addition, there is an **additional chair drumming** resource to extend your previous work. I would love to see what you come up with at home so please email me to show me what you're doing or to ask for help; [lyndsay.gibson@highfield.northumberland.sch.uk](mailto:lyndsay.gibson@highfield.northumberland.sch.uk)

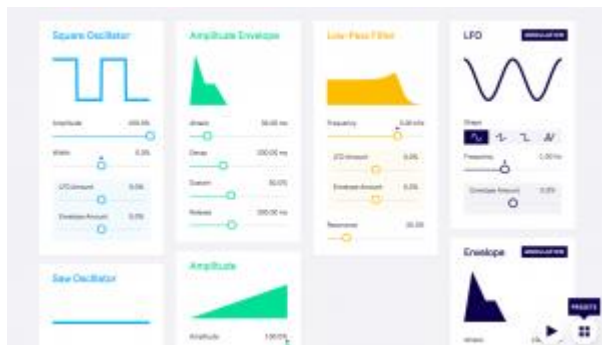

<https://learningmusic.ableton.com/>

This website allows you to learn about beats, melody, chords, bass-lines and song structure. You can work through the tutorials then create your own songs using 'the playground'.

<https://www.youtube.com/channel/UCP4bC1sD1QcMVVxMSEL7qUQ>

A YouTube channel from a music teacher. His channel consists of 6 videos that explain different aspects of music theory in a really engaging and easy-to-understand, visual way. The videos cover time signatures, note & rest values, scales, reading treble & bass clef. Look in the video descriptions for links to online quizzes that Matt has created for each video.

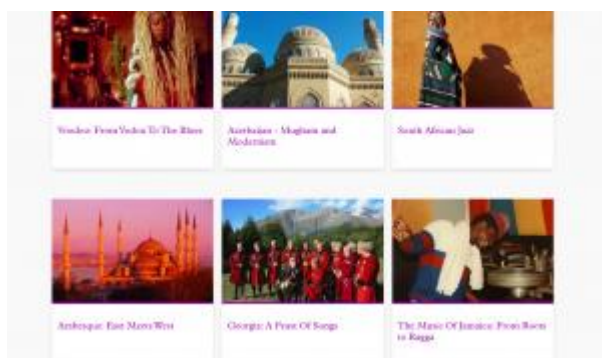

<https://learningsynths.ableton.com/>

This is a fantastic resource for anyone interested in music technology. The interactive site allows you to learn about complicated aspects of synthesis, such as oscillation, envelopes, filters and amplitude, in an easy, intuitive way.

<https://apps.musedlab.org/groovepizza/?museid=bq3I7hyXx&>

A resource which uses a pizza to represent different drum patterns. This easy-to-use drum machine allows you to explore beats from famous songs and create your own using rhythmic grids.

<https://worldmusic.net/blogs/guide-to-world-music>

This website provides an insight into music from around the world, as you may expect from the title! Complete with relevant examples linked to YouTube, the site covers everything from the Tango, to English folk music, reggae and Bellydancing music!
